Your coursework will include human anatomy, human physiology and neurobiology, where the focus is specifically on what happens within the body.

Human Biology Major - Biola University
Now that the 3rd edition is available, I'll once again be buying it purely for my own pleasure and interest. In the 2nd edition that I bought for our daughter, McKean produced a treasure-chest of accurate information, superb illustrations, diagrams and relevant photographs. The sections were well organised and it quite rightly stood as a testament to what good quality educational should be all ...

Statistics and Probability with Applications, Third Edition is the only introductory statistics text written by high school teachers for high school teachers and students. Daren Starnes, Josh Tabor, and the extended team of contributors bring their in-depth understanding of statistics and the challenges faced by high school students and teachers to development of the text and its accompanying suite of print and interactive resources for learning and instruction. A complete re-envisioning of the authors' Statistics Through Applications, this new text covers the core content for the course in a series of brief, manageable lessons, making it easy for students and teachers to stay on pace. Throughout, new pedagogical tools and lively real-life examples help captivate students and prepare them to use statistics in college courses and in any career.

The backdrop of teaching. The act of teaching. The effective teacher.

Scholarly and comprehensive yet accessible, this state-of-the-science work is widely regarded as the definitive graduate-level psychology of religion text. The authors synthesize classic and contemporary empirical research on numerous different religious groups. Coverage includes religious thought, belief, and behavior across the lifespan; links between religion and biology; the forms and meaning of religious experience; the social psychology of religious organizations; and connections to morality, coping, mental health, and psychopathology. Every chapter features thought-provoking quotations and examples that bring key concepts to life. New to This Edition *Revised and updated with the latest theories, methods, and empirical findings.*Many new research examples.*Restructured with fewer chapters for better "fit" with a typical semester.*More attention to the differences between religion and spirituality*Covers emerging topics: genetics and neurobiology, positive psychology, atheism, and more.

The award winning author of Darwin's God exposes the religious presuppositions of scientific naturalism and suggests a solution.

Is there only one orthodox Christian perspective on creation-evolution? The authors explore the underlying issues a person needs to understand in order to from convictions regarding origins. Some of these issues are rooted in philosophy, some in the natural sciences, and some in biblical studies--all of which are explored.
