Enhancement Exercises for Biology can augment any college-level biology course. The active learning modules featured in the Enhancement Exercises provide the best opportunity for students to learn and experience biology. The modules challenge students by providing activities ranging from simple, guided inquiry to more thoughtful, open-ended, research-based activities. Assign all or a portion of an individual exercise as applicable to your specific course. This book has been designed so the student can complete the assignments without any need for specialized lab equipment. The exercises can be completed by visiting local outdoor environments or by using common items easily obtained at home or the grocery store.

As scientific progress hinges on the continual discovery and extension of previous discoveries, this series, Discoveries in Plant Biology, is specially compiled to provide an atlas of the landmark discoveries in the broad span of plant biology. The collection of chapters, written by renowned plant biologists, describe how classic discoveries were made and how they have served as the foundation for subsequent discoveries. We hope that this will facilitate our readers' quest to advance their knowledge based on the advancements made previously by others. The 21 discoveries described in this First Volume all form the foundations of modern plant biology. The contributors, many of whom are themselves the researchers who made the discoveries, bring readers back in time to retrace the steps of the discoveries. Following the creative thoughts of the scientists in deciphering the natural laws, readers may appreciate how each field was developed from a simple subject to an advanced multidisciplinary field. Contents:Abscisic Acid: Discoveries and Exploration of Properties (F T Addicott)History of the Discovery of Ethylene as a Plant Growth Substance (M E Saltveit et al.)The Discovery of Transposable Elements (N Fedoroff)Discovery of T-DNA Agrobacterium Tumefaciens (M P Gordon)The Discovery of Fraction 1 Protein (Rubisco) (S G Wildman)C4 Photosynthesis: Discovery, Resolution Recognition, and Significance (W D Hatch & C R Slack)The Path of Carbon in Photosynthesis: 1942 - 1955 (A A Benson)Discoveries in Biological Nitrogen Fixation (R H Burris)The Discovery of Biological Clocks (F B Salisbury)and other papers Readership: Students and researchers in botany, biochemistry, genetics and plant physiology.
