Catheterisation The  
Cardiac catheterisation is an  
invasive diagnostic procedure  
that provides important  
information about the structure  
and function of the heart. It  
usually involves taking X-rays of  
the heart's arteries (coronary  
arteries) using a technique called  
coronary angiography or  
arteriography. The resulting  
images are known as coronary  
angiograms or arteriograms.
