If put simply, the
cloud computing
concept actually
refers to sharing
resources,
software, and
information
through a network.
With an internet
connection, user's
information and
data are stored on

The concept of
Cloud

Computing came
into existence in
1950 with
implementation of
mainframe

computers,
accessible via
thin/static clients.

Since then, cloud
computing has
been evolved from

static clients to dynamic ones from software to services. The following diagram explains the evolution of cloud computing:
