10) Army Group South (7 April-7 May 1945) by Lothar Dr. Rendulic (army group commander).

This paper is a case study in the wartime evolution of tactical doctrine. Besides providing a summary of German Infantry tactics of the First World War, this study offers insight into the crucial role of leadership in facilitating doctrinal change during battle. It reminds us that success in war demands extensive and vigorous training calculated to insure that field commanders understand and apply sound tactical principles as guidelines for action and not as a substitute for good judgment. It points out the need for a timely effort in collecting and evaluating doctrinal lessons from battlefield experience.

--Abstract.

Describing the radical transformation in German Infantry tactics that took place during World War I, this is the first detailed account of the evolution of stormtroop tactics available in English. It covers the German Infantry's tactical heritage, the squad's evolution as a tactical unit, the use of new weapons for close combat, the role of the elite assault units, and detailed descriptions of offensive battles. Stormtroop Tactics is required reading for professional military officers, military historians, and enthusiasts.

This study investigates the German spring offensive of 1918 to determine how the Germans achieved tactical success, yet failed to reach their strategic objective. The study covers the development of new German infantry tactics during limited offensive operations and conduct of the "elastic defense" on the western front. It investigates the development of artillery tactics on the eastern front, and the incorporation of these artillery and infantry tactics into larger scale offensives at Caporetto. The study describes the preparation of both the infantry and artillery units for the "Michael" offensive. The relationship between the infantry and artillery tactics combined with the British defense is the key to determine the causes for success and failure. The German tactical system used in "Operation Michael" was a brilliant adaptation to the lethality of the World War I battlefield. The German techniques were superb tools for conducting a breakthrough of a defensive zone. However, the lack of German mobility following the breakthrough foiled the German strategic goal to

# Online Library German Battle Tactics On The Russian Front 1941 1945

envelop the British Army. German techniques and lessons learned in this offensive have direct application to U.S. Army infiltration doctrine.

This is a comparative study of the fighting systems of the British and German armies in The Great War. Taking issue with revisionist historians, Samuels argues that German success in battle can be explained by their superior tactical philosophy. The book provides a fascinating insight into the development of infantry tactics at a seminal point in the history of warfare.

[Includes 4 maps and 3 figures] This latest Leavenworth Paper is a case study in the wartime evolution of tactical doctrine. Previous publications of the Combat Studies Institute have examined the peacetime development of doctrine and have increased our knowledge of how doctrine has been applied. With the publication of Captain Lupfer's study, "The Dynamics of Doctrine," the Combat Studies Institute adds another dimension to the history of the processes of doctrinal change. Besides providing a summary of German infantry tactics of the First World War, this study offers insights into the crucial role of leadership in facilitating doctrinal change during battle. It once again reminds us that success in war demands extensive and vigorous training calculated to insure that field commanders understand and apply sound tactical Principles as guidelines for action and not as a substitute for good judgment. It points out the need for a timely effort in collecting and evaluating doctrinal lessons from battlefield experience. Finally, this study reminds us

# Online Library German Battle Tactics On The Russian Front 1941 1945

of yet another fundamental lesson from the past-that tendencies toward accepting the battlefield as a routine can be a deadly error. Altering previously accepted tactics in the middle of a struggle, as the author points out, is a very urgent and serious matter. As members of the Profession of Arms, we must be sensitive to the demands of change, visionary in our examination of their implications, and creative in our adaptation of combat organizations, tactics, and techniques.

This bulletin proposes to summarize information which will serve three purposes: 1. It will permit a better appreciation of the basis of German military strength. The strength of the German Army and its early success in this war owe much to two factors: planning and training. The Nazi leaders planned this war for years in advance of their attack. They prepared for it by a system of military training which begins with children of high-school age. The training system was directed by the old professional army: it depended on effort, thoroughness, and the application of old and tested principles to the means of modern warfare. As an observer remarks, the Germans believed that by hard work and hard training they would "save blood later." This training gave the German army a time advantage over its rivals, although this advantage is being steadily reduced. 2. It will contribute to our knowledge of characteristic German tactics. Those principles of tactics and leadership which are emphasized in training are inevitably reflected in the actual conduct of

# Online Library German Battle Tactics On The Russian Front 1941 1945

operations. While this bulletin will make no detailed study of German tactics, it will bring out the main doctrines which are applied in battle as a result of training. 3. It will suggest methods and points of view which may be useful in training U. S. troops. There are many basic similarities between U. S. training doctrines and those of the German Army, though there are naturally many differences in their use or application. We can learn from the differences as well as the similarities. As far as possible, concrete examples have been given, and in the appendixes there are detailed illustrations, at some length, of certain phases of German training methods.

Helmuth von Moltke's alleged statement the U.S. Civil War was an affair in which two armed mobs chased each other around the country and from which no lessons could be learned underlines a grave misjudgment of this war in contemporary Germany. Today, however, the American Civil War is recognized as the first modern war. It produced a number of lessons across the strategic operational and tactical levels that shaped the face of war. But the German observers failed to draw significant conclusions at the time. A wide variety of reasons inhibited a thorough and unbiased analysis. This study aims to analyze the German observations and to arrive at the causes that led to the underestimation and disregard of the lessons from the Civil War. The thesis provides a sketch of the Civil War and the situation of contemporary Germany. It then examines the German observers and their evaluations. Thereafter, the author reflects selected essential lessons of the war against the contemporary German military evolution.

In a final step the conclusions of these sections will merge into an analysis of the causes, which prevented the German army from arriving at the lessons of the U.S. Civil War.

Chronicles the rise and eventual fall of Nazi Germany during World War II.
