Fascism vs. Capitalism: The Central Ideological Conflict of Our Times "Fascism" has become a term of general derision and rebuke. It is tossed casually in the direction of anything a critic happens to dislike. But fascism is a real political and economic concept, not a stick with which to beat opponents arbitrarily. The abuse of this important word undermines its true value as a term referring to a very real phenomenon, and one whose spirit lives on even now. Fascism is a specific ideology based on the idea that the state is the ideal organization for realizing a society's and an individual's potential economically, socially, and even spiritually.

The state, for the fascist, is the instrument by which the people's common destiny is realized, and in which the potential for greatness is to be found. Individual rights, and the individual himself, are strictly subordinate to the state's great and glorious goals for the nation. In foreign affairs, the fascist attitude is reflected in a belligerent chauvinism, a contempt for other peoples, and a society-wide reverence for soldiers and the martial virtues. Lew Rockwell, in this new volume, examines the starkly contrasting systems of capitalism and fascism, noting pro-fascist trends in recent decades as well as the larger historical trends in the United States and internationally. In Section One, Rockwell focuses on the nature of fascism and its

influence in Western society, with a focus on American political and economic institutions. In Section Two, Rockwell examines capitalism as the enemy of, and antidote to fascism. Combining economics, history, and political philosophy, this book doesn't just provide a diagnosis of what ails American and Western society, but also sheds light on how we might repair the damage that has been done, and with the help of the intellectual work of great minds like Murray Rothbard and Ron Paul, we might as a society shed the fascism of our times and look to freedom instead.

The Role of Place in Literature is a groundbreaking study exploring the use of metaphors and images of place in literature. Lutwack takes a dynamic view of the relationship between place and the action or thought in a work. Drawing comparisons over a wide range of works, principally American and British literature of the nineteenth and twentieth centuries, he illustrates how writers have charged different environments with symbolic and psychological meaning.

Journalist Walls grew up with parents whose ideals and stubborn nonconformity were their curse and their salvation. Rex and Rose Mary and their four children lived like nomads, moving among Southwest desert towns, camping in the mountains. Rex was a charismatic, brilliant man who, when sober, captured his children's imagination, teaching them how to embrace life fearlessly. Rose Mary painted and wrote

and couldn't stand the responsibility of providing for her family. When the money ran out, the Walls retreated to the dismal West Virginia mining town Rex had tried to escape. As the dysfunction escalated, the children had to fend for themselves, supporting one another as they found the resources and will to leave home. Yet Walls describes her parents with deep affection in this tale of unconditional love in a family that, despite its profound flaws, gave her the fiery determination to carve out a successful life. -- From publisher description.
