~~Mathcounts School Sprint Round Solutions - Orris~~

Due to the bisection,  $\angle DBC = 1$  2.  $\angle ABC = 100/2 = 50$  degrees. Because the sum of the measures of the three angles of a triangle is always  $180^\circ$ , we have:  $180 = \angle DBC + \angle BCD + \angle BDC = 50 + 20 + \angle BDC = 70 + \angle BDC$ , so:  $\angle BDC = 180 - 70 = 110$  degrees. 2.

## ~~Sprint Round~~

MATHCOUNTS Competition Structure Sprint Round. 30 problems are given all at once. Students have 40 minutes to complete the Sprint Round. This round is very fast-paced and requires speed and accuracy as well. The earlier problems are usually the easiest problems in the competition, and the later problems can be as hard as some of the Team Round ...

## ~~Art of Problem Solving~~

MATHCOUNTS competition typically consists of 4 rounds—Sprint, Target, Team and Countdown Rounds. Altogether the rounds take about 3 hours to complete. However, Team and Countdown Rounds will not be conducted officially in the 2020–2021 Competition Series until the national level. Here's what each round looks like. Sprint Round 40 minutes
