~~Preventive Services & Screenings~~

~~The FQHC services consist of services that are similar to those provided in rural health clinics (RHC) but also include preventive primary services, as described in Pub. 100-02, Medicare Benefit Policy Manual, chapter 13. An RHC cannot be concurrently approved for Medicare as both an FQHC and an RHC.~~

Patient-centered, high-quality health care relies on the well-being, health, and safety of health care clinicians. However, alarmingly high rates of clinician burnout in the United States are detrimental to the quality of care being provided, harmful to individuals in the workforce, and costly. It is important to take a systemic approach to address burnout that focuses on the structure, organization, and culture of health care. Taking Action Against Clinician Burnout: A Systems Approach to Professional Well-Being builds upon two groundbreaking reports from the past twenty years, To Err Is Human: Building a Safer Health System and Crossing the Quality Chasm: A New Health System for the 21st Century, which both called attention to the issues around patient safety and quality of care. This report explores the extent, consequences, and contributing factors of clinician burnout and provides a framework for a systems approach to clinician burnout and professional well-being, a research agenda to advance clinician well-being, and recommendations for the field.

The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

This guide to successful practices in observation medicine covers both clinical and administrative aspects for a multinational audience.

SAS Programming with Medicare Administrative Data is the most comprehensive resource available for using Medicare data with SAS. This book teaches you how to access Medicare data and, more importantly, how to apply this data to your research. Knowing how to use Medicare data to answer common research and business questions is a critical skill for many SAS users. Due to its complexity, Medicare data requires specific programming knowledge in order to be applied accurately. Programmers need to understand the Medicare program in order to interpret and utilize its data. With this book, you'll learn the entire process of programming with Medicare data—from obtaining access to data; to measuring cost, utilization, and quality; to overcoming common challenges. Each chapter includes exercises that challenge you to apply concepts to real-world programming tasks. SAS Programming with Medicare Administrative Data offers beginners a programming project template to follow from beginning to end. It also includes more complex questions and discussions that are appropriate for advanced users. Matthew Gillingham has created a book that is both a foundation for programmers new to Medicare data and a comprehensive reference for experienced programmers. This book is part of the SAS Press program.

Condition Codes 44 and W2 Training Handbook Pack includes 5 handbooks Kimberly Anderwood Hoy Baker, JD, CPC Through the use of condition codes 44 and W2, hospitals can now be paid under Medicare Part B for certain inpatient cases that they self-deny within a year of the date of service. This training handbook guides utilization review (UR) staff, compliance professionals, physician advisors, billers, case managers, and others through the choices and processes involved in using these codes, allowing them to make the best decisions for their organization's bottom line. The Condition Codes 44 and W2 Training Handbook helps staff understand when and how to use condition codes W2 and 44, as well as the effects they have on reimbursement and the revenue cycle. This handbook leads readers through the complex decision-making processes regarding the options for rebilling self-denied claims. Providing clear, concise interpretation of complicated regulatory guidance, the handbook presents the information in practical, easy-to-understand terms for a wide range of hospital professionals. Staff members that would benefit from this resource include: UR/UM professionals, Inpatient billing managers and staff, Compliance managers and staff, Nurse auditors, Revenue integrity professionals, Finance professionals, Physician advisors, CFO, HIM managers and directors, Case managers
