Since the 6/e published, many things have affected our economy: the Presidential Election, the impact of the 9/11 tragedy, and the recession that we are all living through on a daily basis. The updated edition, written by two highly respected economists and educators, uses the "Stories, Graphs, and Equations" approach to make economic concepts accessible and relevant to a wide reading audience. A five-part organization covers an introduction to economics, concepts and problems in macroeconomics, goods and money markets, macroeconomic analysis, and the world economy. For individuals getting their first--and often challenging--look at the core concepts of economics.
