This little book concentrates on the foundations of modern physics (its QC ABC's SOCO) and its most fundamental constants: c (Co the velocity of light and \hbar (Co the quantum of action). First of all, the book is addressed to professional physicists, but in order to achieve maximal concentration and clarity it uses the simplest (high school) mathematics. As a result many pages of the book will be useful to college students and may appeal to a more general audience."

THE NOTABLE ASPECTS OF THE BOOK ARE AS FOLLOWS: The book is divided into four subjects – History, Geography, Political Science and Economics. Each chapter begins with a flow chart explaining the basic concepts. All chapters consist of NCERT Solutions in a separate section 'NCERT Corner'. Objective type questions include – Multiple Choice Questions Fill in the blanks True and False Sequencing questions Correct and Rewrite questions Assertion-Reason questions Source based questions Very short, Short and Long Answer questions based on latest CBSE guidelines. HOTS (High Order Thinking Skills) are given to think creatively, critically and innovatively. Evaluate yourself through Self-Assessment Test given at the end of every chapter to enhance your learning process. Three Periodic Test comprise of Pen Paper Test and Multiple Assessments ,which are given as part of the internal assessment. Five Model Test Papers (solved and unsolved) are provided for practice for final examination.

The winners of the Nobel Prize show how economics, when done right, can help us solve the thorniest social and political problems of our day. Figuring out how to deal with today's critical economic problems is perhaps the great challenge of our time. Much greater than space travel or perhaps even the next revolutionary medical breakthrough, what is at stake is the whole idea of the good life as we have known it. Immigration and inequality, globalization and technological disruption, slowing growth and accelerating climate change--these are sources of great anxiety across the world, from New Delhi and Dakar to Paris and Washington, DC. The resources to address these challenges are there--what we lack are ideas that will help us jump the wall of disagreement and distrust that divides us. If we succeed, history will remember our era with gratitude; if we fail, the potential losses are incalculable. In this revolutionary book, renowned MIT economists Abhijit V. Banerjee and Esther Duflo take on this challenge, building on cutting-edge research in economics explained with lucidity and grace. Original, provocative, and urgent, Good Economics for Hard Times makes a persuasive case for an intelligent interventionism and a society built on compassion and respect. It is an extraordinary achievement, one that shines a light to help us appreciate and understand our precariously balanced world.

The Book Thoroughly The Following: Physical Chemistry With Detailed Concepts And Numerical Problems. Organic Chemistry With More Chemical Equations. Inorganic Chemistry With Theory And Examples. In Addition To A Well Explained Theory The Book Includes Well Categorized Classified And Sub-Classified Questions On The Basis Of Latest Trends Of Examination Papers. Salient Features As Per The Syllabus Of Engineering And Medical Entrance Examinations Previous Years Solved Papers Every Unit Contains (I) Main Highlights; (Ii) Multiple Choice Questions; (Iii) True And False Statements; (Iv)Hints And Solutions.
