identify indicators at all levels of the results chain, and not just at the level of outcomes. Information on process is useful for documenting programme implementation over time and explaining differences across programme sites.

### *BASIC PRINCIPLES OF MONITORING AND EVALUATION*

Indicators are clues, signs or markers that measure one aspect of a program and show how close a program is to its desired path and outcomes. Indicators are realistic and measurable criteria of project progress. They should be defined before the project starts, and allow us to monitor or evaluate whether a project does what it said it would do.

### *What are Indicators And Types of Indicators? | Monitoring ...*

Relevant and realistic - the monitoring and evaluation system and related indicators establish levels of performance that are likely to be achieved in a practical manner and that reflect the expectations of stakeholders. Timely - indicators need to be time sensitive to change. For example, some variables are slow changing and highly variable across years (e.g. climate), meaning that progress towards outcomes can be difficult to assess over the short term.
