Firefighters who want to advance must be skilled not only on the fireground, but in the assessment center as well. In **"Assessment Center Strategy and Tactics"**, Deputy Chief Michael A. Terpak provides a comprehensive approach to the assessment process. A veteran firefighter and fire officer with over 30 years' experience in one of the nation's most congested and busiest cities, Deputy Chief Terpak includes step-by-step test preparation, scoring strategies, and test-taking tips as well as study cues for exercises that involve structure fires, hazardous material incidents, structural collapse, and beyond.**Read **"Assessment Center Strategy and Tactics"** and broaden your understanding of the true test of the knowledge, skills and abilities that awaits you as you climb the ladder to success.**

Unique in focus and content, this book explores the basic concepts of public personnel management as they apply specifically to the fire service environment and circumstances. Reflecting the author's extensive experience as a fire chief of a large fire department and a state fire training director, it features insights, discussions, and real-world examples that fire service personnel will recognize and relate to instantly.**Overview of Personnel Management. Workforce Issues of the 21st Century. Legal Issues. Job Analysis and Design. Fire Service Recruitment. Selection for Employment and Promotion. Training and Development. Performance Appraisal. Discipline. Health and Safety. Labor Relations and Collective Bargaining.**For practicing and prospective fire service personnel managers.

Positive youth development is a strengths-based, positive psychology approach to fostering adolescents' educational engagement and achievement. It focuses not just on students' academic development but also on their vocational, social, and emotional development. The positive youth development philosophy is at the heart of Cynthia Hazel's unique model of secondary school change, which uses a multi-tiered system of support to challenge the status quo of widespread achievement gaps. In this thought-provoking book, Cynthia Hazel presents her positive youth development-multi-tiered system of support model, including its theoretical foundations, practical instructions for implementing the model, and case examples illustrating application. Recognising that students' own voices are critical to their empowerment and strong outcomes, the model calls for students to participate alongside parents, teachers, and administrators in designing and guiding the school's support structures. The resulting paradigm shift - truly empowered learning - offers hope for all secondary schools, especially those in which many students currently do not achieve postsecondary success.

Decades of research have demonstrated that the parent-child dyad and the environment of the family&Cwhich includes all primary caregivers&C"are at the foundation of children's well- being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Advances in medical, biomedical and health services research have reduced the level of uncertainty in clinical practice. Clinical practice guidelines (CPGs) complement this progress by establishing standards of care backed by strong scientific evidence. CPGs are statements that include recommendations intended to optimize patient care. These statements are informed by a systematic review of evidence and an assessment of the benefits and costs of alternative care options. Clinical Practice Guidelines We Can Trust examines the current state of clinical practice guidelines and how they can be improved to enhance healthcare quality and patient outcomes. Clinical practice guidelines now are ubiquitous in our healthcare system. The Guidelines International Network (GIN) database currently lists more than 3,700 guidelines from 39 countries. Developing guidelines presents a number of challenges including lack of transparent methodological practices, difficulty reconciling conflicting guidelines, and conflicts of interest. Clinical Practice Guidelines We Can Trust explores questions surrounding the quality of CPG development processes and the establishment of standards. It proposes eight standards for developing trustworthy clinical practice guidelines emphasizing transparency; management of conflict of interest ; systematic review--guideine development intersection; establishing evidence foundations for and rating strength of guideline recommendations; articulation of recommendations; external review; and updating. Clinical Practice Guidelines We Can Trust shows how clinical practice guidelines can enhance clinician and patient decision-making by translating complex scientific research findings into recommendations for clinical practice that are relevant to the individual patient encounter, instead of implementing a one size fits all approach to patient care. This book contains information directly related to the work of the Agency for Healthcare Research and Quality (AHRQ), as well as various Congressional staff and policymakers. It is a vital resource for medical specialty societies, disease advocacy groups, health professionals, private and international organizations that develop or use clinical practice guidelines, consumers, clinicians, and payers.
