Women Who Launched The Computer Age is about human computers. Female mathematicians who worked for the Army programming ENIAC were called computers. The Army hired them to calculate where bombs should land and that was called setting weapons a/k/a pinpointing where the missile would land where they would do the most damage.

*Women Who Launched the Computer Age by Laurie Calkhoven*

In 1946, six brilliant young women programmed the first all-electronic, programmable computer, the ENIAC, part of a secret World War II project. They learned to program without any programming languages or tools, and by the time they were finished, the ENIAC could run a complicated calculus equation in seconds.

Meet the women who programmed the first all-electronic computer and built the technological language kids today can't live without in this fascinating, nonfiction Level 3 Ready-to-Read, part of a new series of biographies about people "you should meet!" In 1946, six brilliant young women programmed the first all-electronic, programmable computer, the ENIAC, part of a secret World War II project. They learned to program without any programming languages or tools, and by the time they were finished, the ENIAC could run a complicated calculus equation in seconds. But when the ENIAC was presented to the press and public, the women were never introduced or given credit for their work. Learn all about what they did and how their invention still matters today in this story of six amazing young women everyone should meet! A special section at the back of the book includes extras on subjects like history and math, plus interesting trivia facts about how computers have changed over time. With the You Should Meet series, learning about historical figures has never been so much fun!

The story of Jean Jennings, Kay McNulty, Frances Bilas, Ruth Lichterman, Betty Snyder, and Marlyn Wescoff, who were chosen to work on the ENIAC computer.

The story of Jean Jennings, Kay McNulty, Frances Bilas, Ruth Lichterman, Betty Snyder, and Marlyn Wescoff, who were chosen to work on the ENIAC computer as part of a secret WWII mission.

Get to know some of the many people who have changed history with this boxed set featuring six fascinating, nonfiction Level 3 Ready-to-Reads that are part of a series of biographies about people "you should meet!" Get to know the first women computer programmers, the first African-American principal dancer at the American Ballet Theater, an incredible Olympic gold medalist who broke records and barriers, the first female African-American astronaut, the amazing "Father of Surfing," and one of the greatest mathematicians of all time with the first six books in the You Should Meet series! A special section at the back of each book includes extras on subjects like history and math, plus fun trivia facts on ballet, computer programming, and more! With the You Should Meet series, learning about historical figures has never been so much fun! This collection includes: Women Who Launched the Computer Age Mae Jemison Jesse Owens Misty Copeland Duke Kahanomoku Katherine Johnson

Empowering stories of game-changing women Dorothy Parker observed, "It's a man's world;" the lady entrepreneurs and game-changers profiled in Women Who Launch would beg to differ. Unlike the matrons of the 1950s-the women who lunched-these kick-ass females left their DNA in the annals of time. A history of women in business and beyond: Julia Ward-Howe showed what's good for the goose is good for the gander when she created the Girl Scouts of America. Sara Joseph Hale-authoress of Mary had a Little Lamb- convinced Lincoln to launch a national day of thanks while Anna Jarvis persuaded President Wilson to initiate a day in tribute of mothers. Estee Lauder revolutionized the cosmetics industry. The tradition of these Mothers of Invention continued when, compliments of knitter Krista Suh, the heads of millions were adorned with pink, pussy-cat ears in the largest women's march in history. These women who launched prove-in the words of Rosie the Riveter, "We can do it!" Biographies of women creators, innovators, and leaders: Women Who Launch is filled with inspiring true stories of women activists, artists, entrepreneurs who launched some of the most famous companies, brands, and organizations today and changed the world. It is at once a collection of biographies and a testament of female empowerment. Readers will find: • The stories behind renowned companies, brands, and organizations and the diverse women who launched them • Empowering quotes from strong women and those who refused to be kept down • Motivation to all women who want to succeed in their careers, launch companies, and change the world Find motivation in your career and life with the amazing history of women entrepreneurship, activism, and leadership.

Click. Whir. Buzz. Not so long ago, math problems had to be solved with pencil and paper, mail delivered by postman, and files were stored in paper folders and metal cabinets. But three women, Betty Snyder, Jean Jennings, and Kay McNulty knew there could be a better way. During World War II, people hoped ENIAC (Electronic Numerical Integrator and Computer), one of the earliest computers, could help with the war effort. With little guidance, no instructions, and barely any access to the machine itself, Betty, Jean, and Kay used mathematics, electrical engineering, logic, and common sense to command a computer as large as a room and create the modern world. The machine was like Betty, requiring outside-the-box thinking, like Jean, persistent and consistent, and like Kay, no mistakes, every answer perfect. Today computers are all around us, performing every conceivable task, thanks, in large part, to Betty, Jean, and Kay's pioneering work. Instructions Not Included is their story. This fascinating chapter in history is brought to life with vivid prose by Tami Lewis Brown and Debbie Loren Dunn and with striking illustrations by Chelsea Beck. Detailed back matter including historical photos provides a closer look.

If you loved Hidden Figures or The Rise of the Rocket Girls, you'll love Claire Evans' breakthrough book on the women who brought you the internet-written out of history, until now. "This is a radically important, timely work," says Miranda July, filmmaker and author of The First Bad Man. The history of the internet is more than just alpha nerds, programmers, and male garage-to-riches billionaires. Female visionaries have always been at the vanguard of technology and innovation. In fact, women turn up at the very beginning of every important wave in technology. They may have been hidden in plain sight, their inventions and contributions touching our lives in ways we don't even realize, but they have always been part of the story. In a world where tech companies are still male-dominated and women are often dissuaded from STEM careers, Broad Band shines a much-needed light on the bright minds history forgot, from pioneering database poets, data wranglers, and hypertext dreamers to glass ceiling-shattering dot com-era entrepreneurs. Get to know Ada Lovelace, who wove the first computer program in 1842, and Grace Hopper, the tenacious mathematician who democratized computing after World War II. Meet Elizabeth "Jake" Feinler, the one-woman Google who kept the earliest version of the Internet online, and Stacy Horn, the New York cyberpunk who ran one of the world's earliest social networks out of her New York City apartment in the 1980s. Join the ranks of the pioneers who defied social convention to become leaders of the tech revolution. This electrifying corrective to tech history introduces us all to our long-overlooked tech mothers and grandmothers-showing us that if there's a "boy's club" that dominates Silicon Valley today, it's an anachronism.

Meet the inventive kids who are coming up with ways to save the world in this fascinating, nonfiction Level 3 Ready-to-Read, part of a series of biographies about people "you should meet!" Have you ever wondered what you could do to change the world? Find out how kids are helping the environment, inventing incredible medical devices, aiding the homeless, designing apps so other kids won't ever have to eat alone in the cafeteria, and more! Learn all about what they've come up with and how their ideas are changing lives in this story of four amazing kids everyone should meet! A special section at the back of the book includes extras such as biographies of famous young inventors and contemporary activists plus interesting ideas for other ways that kids can change the world. With the You Should Meet series, learning about amazing people has never been so much fun!
